

Coding & Solution

Date	06 july 2026
Team ID	xxxxxx
Project Name	SMART LENDER – AI based loan approval prediction
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	Python, JavaScript, Javascript
Framework(s) Used	Flask

Key Features Implemented	• User Registration & Login • Loan Eligibility Prediction • Secure Authentication • User Dashboard • AI/ML Prediction Model
Pending / Incomplete Features	Email Notifications (if not completed), Admin Dashboard (if not completed)
Setup / Run Instructions	1. Install Python 3.x 2. Install Flask (pip install flask) 3. Install required packages (pip install -r requirements.txt) 4. Run python app.py 5. Open http://127.0.0.1:5000 in a browser

Code Quality Checklist

S.N o	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The Smart Lender application uses a machine learning model to predict loan eligibility based on applicant information. The project is developed using Python and Flask with a user-friendly web interface. The source code is maintained in a GitHub repository and follows clean coding practices.
